VINTAGE 2004

As in 2002, the weather was very good in September 2004. It is a vintage where, Over the past ten years, harvesting took place only once in October, but this is actually the traditional harvest time. Picking was carried out in sunny conditions from 28th September to 15th October.

2004 will be a wine to be kept for a long time, given its tannic structure.
